**The Institution (IEI)**

"The Institution of Engineers (India) or IEI is the largest multidisciplinary professional body that encompasses 15 engineering disciplines and gives engineers a global platform from which to share professional interests. IEI has a membership strength of over 0.8 million. Established in 1920, with its headquarters at 8 Gokhale Road, Kolkata - 700020, IEI has served the engineering fraternity for over nine decades. In this period of time it has been inextricably linked with the history of modern-day engineering. In 1935, IEI was incorporated by Royal Charter and remains the only professional body in India to be accorded this honour. Today, its quest for professional excellence has given it a place of pride in almost every prestigious and relevant organization across the globe. IEI functions among professional engineers, academicians and research workers. It provides a vast array of technical, professional and supporting services to the Government, Industries, Academia and the Engineering fraternity, operating from 122 Centres located across the country. The Institution also provides grant-in-aid to its members to conduct research and development on engineering subjects.

IEI has been recognized as Scientific and Industrial Research Organization (SIRO) by the Ministry of Science & Technology, Govt. of India and besides conducting its own research, provides Grant-in-Aid to UG/PG/ PhD students of Engineering Institutes & Universities. IEI holds the International Professional Engineers (Int PEA) Register for India under the global International Professional Engineers Alliance (Int PEA). The Institution also awards the Professional Engineers (PE) Certification."

**Pune Local Centre (PLC)**

Pune Local Centre was established on 29<sup>th</sup> November 1958 - first local centre established by the Council of IE(I). Before this period, only State Centre were functioning at the capital cities of the states. Over the years Pune has justified the faith reposed by the Council and has become major, active, efficient & popular Centre of the IEI. Pune's rich heritage on historical, social, educational, political, industrial & cultural fronts gives an insight into the growth of the region and indirectly into that of Pune Local Centre; it has always remained the largest local centre of the IEI. Presently, Pune Local Centre has on its roll around 20,000 members. The efficient functioning of the Centre is a result of excellent teamwork, congenial working environment, ever-enthusiastic administration and efficient infrastructure and the participation of large number of young engineers and lady engineers. Because of this unique structure, innovative activities and professional approach the Centre has not only won "The Best Local Centre Award" amongst 125 Centers on all India basis but also set a new role model for the Institution.

**37<sup>th</sup> National Convention of Architectural Engineers**

**& NATIONAL SEMINAR ON**  
**“Modern Trends in Architectural Engineering & Construction Practices”**

**CONTEXT –**

The National convention Of Architectural Engineers is an apex technical activity held once in a year aiming at establishing liaison between the institution , its members and policy makers . Genesis of architectural Engineering is from "system approach" to building design- a design strategy that may include various parameters of design ,integrating then with curtain priorities. Even seven decades after independence we have not been able to provide habitable shelters to majority of the population, despite the fact that major part of national outlay is for constricton and infrastructure ,highlights they need for revision in our housing problems. Architectural designing is an approach to building design, its ability include many parameters can elevate it to a strategy, to design for over-all development of the society that include socio-economic, cost effective and eco friendly designs dealing with issues of special challenges like housing in disaster-prone areas lesions from building tradition etc are some of the demand areas that a building solution can cater to by architecture design approach.

The main theme of 37<sup>th</sup> national convention is aiming dissemination of new information and research finding and to fascinated interaction between professionals working various field of architecture, Planning and Engineering.

The aim of this seminar is to broaden the vision of technocrats to build the environment conducive or designing or construction of affordable, aesthetic cost competitive and with eco friendly buildings capable of meeting needs of Indian citizens. It aims to bring all professional connected with built environment like planners architects ,structural engineers , environmental planners, ecologist, researchers , teachers, builders, contractors , administrators, developers ,financers and manufacturers of building materials on a common platform so as to form collective opinion on a subject related to main theme and sub theme.
